RAPid Supplier Performance Analytics

The next generation in supplier performance management.

Rosslyn
Data Technologies

Get fast visibility of your supplier performance in days, not months.

SUPPLIER PERFORMANCE MONITORING

Are you negotiating great contracts but not realising the benefits? Feel increasingly exposed to the risk in your supply chain but have no efficient way of managing it?

The performance of your suppliers, and your relationships with them, has a direct impact on the performance of your business. Without monitoring the health of these relationships, you will not maximise the available returns. Worse still, you may be opening up your business to costly failures and unnecessary risk.

WHY MONITOR SUPPLIER PERFORMANCE?

- **Add value** – Closer collaboration with your suppliers facilitates stronger relationships and creates value

- **Minimise risk** – Increased visibility provides the ability to predict issues, take corrective action and reduce the risk of costly supply-chain disruptions

- **Reduce costs** – Understand the business effect of late payment days, late delivery, faulty parts or missed SLAs on your profit margins and use the data to make your supply chain more efficient

If you are

- Starting out with a Supplier Relationship Management programme

- Looking to make Excel-based performance management more efficient

- Craving to simplify complex, labour-intensive supplier management programmes

LOOK NO FURTHER.

WHY RAPID SUPPLIER PERFORMANCE ANALYTICS?

The RAPid Supplier Performance Analytics app, available through the RAPid cloud platform, enables you to collect and manage the data you need for a successful Supplier Relationship Management programme.

Accessible through an user-friendly and intuitive interface, you will be able to create scorecards and set KPIs to monitor and record supplier performance. The platform allows users to combine disparate data sources into a single dashboard, allowing them to create a cohesive 360 degree view of supplier relationships.

- **Efficient, flexible and focussed** – Build performance scorecards relevant to your business in minutes, gather data fast and improve your supplier management immediately

- **Instant adoption** – Painless uptake among stakeholders via a simple, mobile optimised interface

- **360⁰ view** – Integration with any data source provides a complete profile of your supplier relationships. View and analyse a full view of your performance results and respond to hot issues quickly

You're completely in control. This next generation supplier analytics app provides fully integrated user-friendly tools so you can efficiently collect data anytime, anywhere and easily manage your supplier management initiatives.
